INTRODUCTION

E-commerce, also known as electronic commerce or internet commerce, refers to the buying and selling of goods or services using the internet, and the transfer of money and data to execute these transactions. Ecommerce is often used to refer to the sale of physical products online, but it can also describe any kind of commercial transaction that is facilitated through the internet. Independent freelancers, small businesses, and large corporations have all benefited from ecommerce, which enables them to sell their goods and services at a scale that was not possible with traditional offline retail.

Global retail ecommerce sales are projected to reach $27 trillion by 2020.

The outline of our proposed presentation include;

❑ Aim of Proposed Project
❑ How the Proposed E-commerce Online Shopping Website Solves Problems of Consumers and Customers.
❑ Content And Requirement

❑ Proposed User Interface
❑ Development Tools
